Integration with Microsoft Copilot

Get more done using the AI capabilities of Microsoft Copilot!

Therefore™ now offers an integration with Microsoft Copilot, allowing you to leverage AI to gain useful insights about the information you store in Therefore™.

The possibilities are endless, but here are some ideas of what you can do with Copilot and Therefore™:

- Collect job applications using eForms and ask Copilot to help you sort, analyze, and create personalized interview questions for each candidate.
- Get answers that help you understand internal documents like vacation policies, emergency procedures, or SOPs.
- Compare two or more documents and find the differences between them, and ask Copilot to draft a summary to send as an email.
- Ask questions about a large set of documents within a project and get answers without searching through individual files.

Use the Copilot app to gain insights into critical information stored in your documents.

> From the perspective of Moyaware, what are some areas of the contract that we can renegotiate next year to gain more favorable conditions?
>
> **Therefore Graph Connection CF**
>
> Based on the contents of the **2024 and 2025 service agreements between Moyaware and TrustUs IT**, here are several areas that Moyaware could consider **renegotiating in the next contract cycle** to secure more favorable terms: CopilotTest - This ... +1

Easily access Copilot from the Microsoft applications you use the most, like Word, Excel, PowerPoint, and Outlook.

Licensing

You will need:

- A connector license for Copilot (from Therefore™)
- Copilot licenses for anyone who wants to use the integration (obtained from Microsoft)
- Entra ID as the External User Directory in Therefore™. This controls the authentication with Copilot.

Therefore™ → **Microsoft Graph** ← **Copilot**
